

## ITEM 1

**Summary Table of Fields of Work and Corresponding ICT Tools**

| <b>Field of Work</b>                      | <b>Specific ICT Tools Used in the Field</b>                                                                                           | <b>Primary Purpose / Role in Workplace</b>                                                          |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Healthcare (Medicine)</b>              | <ul style="list-style-type: none"><li>• Digital Heart Rate Monitor / Patient Monitor</li><li>• Clinical Management Software</li></ul> | Displays real-time vital signs for diagnosis and manages digital patient health records.            |
| <b>Banking &amp; Finance</b>              | <ul style="list-style-type: none"><li>• Automated Teller Machine (ATM)</li><li>• Core Banking Database System</li></ul>               | Automates cash withdrawals/deposits and tracks customer transaction accounts electronically.        |
| <b>Business &amp; Commerce</b>            | <ul style="list-style-type: none"><li>• Barcode Scanner</li><li>• Electronic Point of Sale (POS) Software</li></ul>                   | Reads product codes at checkout to calculate sales totals and update stock inventory automatically. |
| <b>Agriculture</b>                        | <ul style="list-style-type: none"><li>• Smartphone / Mobile Device</li><li>• Weather Forecasting App / USSD System</li></ul>          | Receives real-time weather alerts and climate data to plan planting and harvesting schedules.       |
| <b>Public Administration / Governance</b> | <ul style="list-style-type: none"><li>• Desktop / Laptop Computer</li><li>• Biometric Registration Kit (Fingerprint/Camera)</li></ul> | Captures citizen data and processes official registration records for national identity cards.      |
| <b>Education</b>                          | <ul style="list-style-type: none"><li>• Desktop Computer</li><li>• Internet Browser / Word Processor</li></ul>                        | Facilitates typing practice, digital note-taking, and online research for academic subjects.        |

## **ITEM 2**

### **(a) Hardware Tools Required and Solutions to Business Problems**

#### **Digital Camera / Camcorder:**

Replaces manual or low-quality recording setups. Allows Moses to capture high-definition photos and clear video recordings of community events without missing crucial details.

#### **External Microphone:**

Resolves poor or muffled audio quality recorded by built-in camera mics. Captures clear, professional voice tracks during client interviews by filtering out ambient background noise.

#### **Central Processing Unit (CPU / Processor):**

Solves system lag and freezing during rendering. Executes processing instructions rapidly, enabling smooth editing and rendering of large video files.

#### **Digital Projector (with Projection Screen):**

Eliminates the problem of gathering large crowds around a small monitor. Projects high-resolution video onto a large screen or wall so fifty people can comfortably watch simultaneously.

#### **Desktop Printer:**

Removes the need to outsource printing tasks to distant towns. Generates physical paper certificates on-site for Moses's students immediately upon course completion.

#### **Network Router / Wi-Fi Modem:**

Eliminates long, expensive bus journeys to deliver files to town. Establishes a local internet connection to send finished video files directly via email or cloud transfer.

#### **External Hard Drive / High-Capacity Solid State Drive (SSD):**

Solves the issue of keeping files scattered across multiple small memory cards. Provides a single, secure backup system to store old videos safely for long-term archiving.

### **(b) Hardware Classification of Identified Tools**

#### **Input Devices**

- Digital Camera / Camcorder
- External Microphone

**Processing Device**

- Central Processing Unit (CPU)

**Output Devices**

- Digital Projector
- Desktop Printer

**Storage Devices**

- External Hard Drive / External SSD

**Communication / Networking Devices**

- Network Router / Wi-Fi Modem
