INFORMATION AND COMMUNICATION TECHNOLOGY

PAPER 1 (Theory)

2 Hours 15 Minutes

INSTRUCTIONS TO CANDIDATES:

*This paper consists of **two** sections; **A** and **B**.*

*It has **five** examination items.*

*The item in Section **A** is **compulsory**.*

*Section **B** has **two** parts; **I** and **II**.*

*Answer **two** items from this section choosing **one** item from each part.*

All responses should be presented in formal writing layouts.

SECTION A

This section is compulsory

Item 1

Following a confirmed Ebola outbreak, the Kyenjojo District Health Officer (DHO) plans a massive community sensitization meeting at Kyenjojo Villa Playing Grounds for an expected crowd of 40,000 residents.

During the event, the management team needs to:

- Display visual presentations of symptoms and prevention protocols to the large gathering.
- Digitally register and screen all attending community members at the entrance gates.
- Provide household heads with hardcopy public health guidelines and policy documents.
- Ensure real-time communication and strict security monitoring.
- Capture high-quality photos and videos for official digital archives and reports.

The Public Health Communications Officer, who is your friend, is tasked with preparing all the necessary equipment. However, they do not know which ICT tools to use or how to maintain them in an open-field environment.

Task:

Explain to your friend the specific ICTs they can use for this event, how to deploy them, and how to maintain them in good working condition.

SECTION B

PART I

Attempt one item from this part

Item 2

James established a computer service centre in his home trading centre and employed someone to run the business on his behalf to provide internet service to the community members. He was surprised later to discover that the internet connection was heavily abused by the employee for unauthorized activities like cyberbullying, using weak passwords and accessing inappropriate content, which compromised data security.

In addition, many devices had got spoilt and could no longer function. Joseph closed the business and took all the remaining devices home, piling the faulty ones on the table in the sitting room. His wife is concerned about the faulty devices which have congested the sitting room. Joseph needs to avoid similar challenges in future.

Task:

Advise James on how best he could have;

- (a) handled the situation at his business to prevent closing of the business.
- (b) managed the pile on the table without congesting the sitting room.

Item 3

Naticia works with a community health centre as a data clerk. The health centre receives many patients on a daily basis, which makes her spend sleepless nights on her laptop as she prepares medical documents and reports. As a result, Naticia has started feeling body pains and other health challenges.

Due to limited infrastructure and space, Naticia's office is overcrowded with old non-functional computers and electronic equipment. Naticia needs help on how to handle the health challenges as well as the old non-functional computers and electronic equipment.

Task:

- (a) Make a write-up explaining to Naticia how best she can handle her health challenges without leaving her job.
- (b) Advise Naticia on the best methods of managing what has overcrowded her office.

PART II

Attempt one item from this part

Item 4

The Electoral Commission of Uganda conducts general elections and voter verification exercises periodically. This activity aims to enable the government to support democratic processes and plan effectively for all eligible voting citizens.

In order to enhance data capture and voter registration for the upcoming update exercise, the Electoral Commission implemented the use of biometric identification kits and launched a call for online applications for Voter Verification Officer positions. To qualify, applicants had to possess a valid email address, a typed application letter, copies of their CV and National ID which they had to submit to the Electoral Commission recruitment portal at <https://recruitment.ec.or.ug>.

James was interested in applying for the job but he lacked the skills of ICT and therefore missed the opportunity. He has approached you for guidance with the copy of the advert so that he does not miss out on similar opportunities in future.

Task:

Guide James on the procedure and the necessary ICTs to use in order to apply for similar opportunities in future.

Item 5

A group of youth weavers and artisans in a certain district has been missing many exhibition and funding opportunities which would have helped them improve and market their handicraft products. Recently, they got news from one of their members about an online youth empowerment platform which provides current updates and material support from the Ministry of Gender on how to scale their skills. To join the platform, the cooperative must apply online.

The application process requires accessing an application form on a website, filling it, and having all group members sign the document physically before scanning and submitting it to **digitalcrafts@gov.com**. This has become a challenge to the group members due to their limited experience in using ICTs.

You have been approached by the youth group chairperson for help.

Task:

Prepare a document indicating the appropriate ICTs and steps to be used to help the youth artisans overcome their challenge.

END
