INTERNAL MOCK EXAMS 2026

INFORMATION AND COMMUNICATION TECHNOLOGY

PAPER 2 (Practical)

2 Hours 30 Minutes

INSTRUCTIONS TO CANDIDATES:

*This paper consists of **two** examination items.*

*Answer **both** items in this paper.*

*You are provided with support files in the folder **Internal Mock Support Files***

Use the support files where applicable to supplement the items.

*You are provided with a new **blank Compact Disc** (CD).*

Use a permanent marker to write your name, random number and personal.

You should continually save your work.

You must produce a hard copy for each of your work to accompany a softcopy.

ITEM 1

David runs a youth sports academy in Kayole for talented teens from low-income families. Due to rising costs, he applied to an international sports foundation for help. His request was granted, and he was asked to create a budget following these guidelines:

- Meals per athlete per term by sport: Track & Field is 150,000/=, Football is 120,000/=, and Basketball is 180,000/=
- Kits allowance: 350,000/= for junior athletes (under 15 years) and 600,000/= for senior athletes (15 years and above).
- Essentials Allowance: Females 50,000 and Males 30,000.
- The budget must clearly indicate the total amount spent on each athlete per term and the overall amount David expects per year (3 terms).

The foundation has scheduled a meeting for all supported projects, and David is expected to present the academy's activities, available facilities, future plans, and the budget. David has all the data in a physical folder but lacks ICT skills.

Task

Help David to prepare all he needs to present in the meeting.

Provide a soft copy on a **CD/DVD** and sample hard copies of what you have done to help David, clearly indicating your **name** and **personal number** as the developer on each of those copies.

ITEM 2

Nile Valley Vocational Institute has been facing several challenges in recent years. The institute's publicity in the region is poor; students' enrollment in technical courses has been declining, and it struggles to attract new applicants.

The principal and the institute's Governing Council think that by designing a digital platform as a way of marketing the institution, the surrounding community and the country at large will get to know more about the institute's history, practical courses offered, available workshop facilities, and admission requirements.

The principal has contracted your ICT teacher to do the work. Fortunately, your teacher has in turn assigned the work to you and provided you with some data you may need in the support folder **my_institute**.

Task

Do the assignment.

Provide a soft copy on a **CD/DVD** and sample hard copies of the assignment, clearly indicating your **name** and **personal number** as the developer on each of those copies.

END
